ABOUT **CodeWild**

At CodeWild Learning Hub, we believe true learning goes far beyond textbooks and theory. Founded with a mission to redefine software education, we connect students directly with experienced professionals currently working in the tech industry.

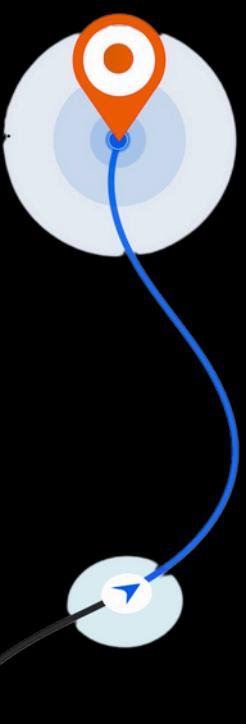

Our vision is simple yet powerful: to create confident, skilled, and industry-ready software professionals who stand out in today's competitive job market.

Unlike traditional training institutes that follow generic syllabi and outdated teaching methods, CodeWild Learning Hub focuses on what truly matters, real-world skills, hands-on projects, and an industry-oriented mindset.

Our mentors aren't just trainers; they are active IT professionals from leading companies who bring their real-world experience, challenges, and solutions into every session. This ensures that our learners gain practical, job-focused knowledge that goes beyond the classroom.

At CodeWild Learning Hub, we don't just teach you how to code. We teach you to think like a developer, solve like an engineer, and deliver like a professional. Our students don't just clear interviews; they build real projects, deploy live applications, and step into the industry with confidence and competence.

We are not just another training institute. We are a transformation platform that prepares you to make a real impact in the real world.

CODEWILD LEARNING HUB ADVANTAGE

Fastest route to your dream career

As a tech learner, you're already on the right path toward professional and academic growth. CodeWild Learning Hub helps you strengthen your skills and enrich your learning journey through real-world industry exposure.

- ✓ Track Your Growth with Live Progress Reports
- ✓ 500+ Industry Connections with Placement Guidance & Support
- ✓ Hands-on Learning through Real-time Industry Projects
- ✓ Instant Feedback to sharpen your skills quickly
- ✓ Flexible Learning Hours 1-to-1 Doubt Resolution with Experts
- ✓ Personalized Learning Journey designed to fit your goals
- ✓ Dynamic Community of Learners & Industry Professionals

HOW TO ENROLL?

Unlock Your Gateway to the IT Industry

Invest in CodeWild

Our payment plans are designed to be student-friendly with affordable fees, scholarships, and flexible installments to make learning accessible to everyone.

We also offer a Free Demo Session so you can experience our teaching before enrolling.

Enrollment Process: Kickstart your journey

HASSLE-FREE REGISTRATION

Register easily via WhatsApp, Email, Phone Call, or directly at our Office.

QUICK EVALUATION

Take a short assessment / discussion call with our team to identify the right course & learning path for you.

BATCH ALLOTMENT

Join your recommended batch with flexible learning schedules and start your upskilling journey with industry experts.

ENROL IN 4 SMALL STEPS

Then Take a Giant Leap

STEP 1

Discuss Your Needs with Our Admin Team

Connect with the CodeWild Learning Hub admin team to discuss the skills you want to learn. Share your preferred schedule for live online sessions and any specific learning preferences.

STEP 2

Customized Mentor Selection

Our team will match you with expert mentors in your chosen field, ensuring the best learning experience. We offer both one-on-one and group sessions tailored to your learning style.

STEP 3

Experience a Free Demo Class

Join a free demo session to experience our unique teaching methodology. This session will help you understand how CodeWild Learning Hub can shape your learning journey.

STEP 4

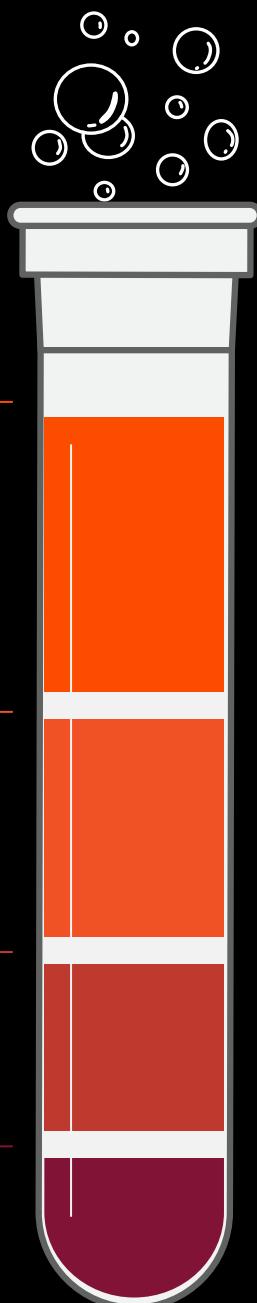

Enroll and Begin Your Tailored Learning Journey

If satisfied with the demo, complete your registration and start learning with industry professionals. Your mentor will guide you every step of the way to help you master the skills needed for success.

OUR W.I.L.D APPROACH

HELP YOU LEARN BETTER

Master core IT concepts and latest industry trends through expert-led sessions and real-world case studies.

Apply your knowledge by developing real-time projects, coding applications, and solving industry-relevant challenges.

Strengthen problem-solving skills with hands-on exercises, structured revision, and interactive discussions.

Build, innovate, and showcase projects that reflect real-world IT scenarios, preparing you for job-ready expertise.

COURSE OFFERINGS

JAVA FULL STACK

Become a professional full-stack developer using Java. Learn Core Java, JDBC, Servlets, Spring Boot, HTML, CSS, JavaScript, and React. Build scalable applications with end-to-end development experience.

JAVA DEVELOPMENT

Develop a strong foundation in Java programming. Learn OOP concepts, collections, multithreading, and frameworks like Spring and Hibernate to create robust desktop and enterprise-level applications.

DSA

Strengthen your problem-solving and coding logic by mastering arrays, linked lists, trees, graphs, and algorithms. Prepare for technical interviews with hands-on challenges and coding practice.

AI / ML

Explore the world of AI and ML using Python. Learn data preprocessing, model training, and algorithm implementation with tools like NumPy, Pandas, TensorFlow, and Scikit-learn. Build intelligent real-world projects.

PYTHON FULL STACK

Master both frontend and backend technologies using Python. Learn HTML, CSS, JavaScript, React, Django/Flask, and MySQL to build dynamic and responsive full-stack web applications from scratch.

PYTHON DEVELOPMENT

Gain in-depth knowledge of Python programming, data handling, and API integration. Learn to build automation scripts, desktop applications, and backend systems with real-world use cases.

DATABASE

Understand the fundamentals of database management systems. Learn SQL and NoSQL databases like MySQL, MongoDB, and PostgreSQL, etc. Gain hands-on experience in database design, queries, optimization, and data security.

UI/UX DESIGN

Learn the art and science of designing user-friendly digital interfaces. Master tools like Figma and Adobe XD, understand user flow, wireframing, and prototyping, and create visually appealing, responsive designs.

COURSE OFFERINGS

DIGITAL MARKETING

Master online marketing strategies and tools. Learn SEO, Google Ads, social media marketing, email campaigns, and analytics to build brand visibility, generate leads, and boost business growth.

SOFTWARE TESTING

Learn manual and automated testing methods to ensure software quality. Get hands-on with Selenium, JUnit, and TestNG to detect bugs, validate functionality, and enhance user experience.

DEVOPS

Bridge the gap between development and operations. Learn CI/CD, Docker, Kubernetes, Jenkins, and Git for faster, efficient, and automated software deployment and monitoring in real-time environments.

CYBER SECURITY

Protect systems and data from digital threats. Learn network security, encryption, ethical hacking, and incident response techniques to defend against modern cyberattacks and breaches.

DATA ANALYST

Learn to analyze and visualize data to uncover insights. Master tools like Excel, SQL, Power BI, and Python libraries (Pandas, NumPy, Matplotlib) to interpret data and support business decisions with real-world projects.

DATA SCIENCE

Master the art of extracting insights from data. Learn Python, statistics, data visualization, and machine learning using tools like Pandas, NumPy, Matplotlib, TensorFlow, and Power BI. Build predictive models and real-world data-driven solutions.

AWS

Gain hands-on experience with cloud computing and deployment. Learn key AWS services like EC2, S3, Lambda, and RDS to host applications, manage infrastructure, and ensure scalability and security.

ETHICAL HACKING

Understand cybersecurity from an attacker's perspective. Learn penetration testing, vulnerability assessment, and network security using tools like Kali Linux, Metasploit, and Wireshark to safeguard digital systems.
